Summary

I am an undergraduate student with a passion for crafting responsive and visually engaging websites. With over 2 years of experience as a Front-End and Back-End Developer, I am adept at transforming ideas into seamless user experiences. My focus is on building aesthetic, functional interfaces that are user-friendly and performance-driven.

Experience

Service Asistant – Sinari Cell (2020 – 2022)

Provided technical assitance for computer services including OS installation, hardware troubleshooting, PC Setup, and Maintenance.

Personal Project

Whatsapp Bot

Developed a Whatsapp bot using the Baileys library that automatically greets users, procesess commands such as checking status and product prices, and provides assistance.

NKS Gift Store

NKS Gift Store is an e-commerce websites designed to offer a variety of gift products. Hosted on Vercel, it allows users to browse and purchase gift with features like product listings, user profiles, and sign-in functionality.

Elysium Rift

Elysium Rift is a web-based, turn-based strategy RPG game. Players can choose unique character roles, engage in real-time combat, and manage attributes such as health, attack, defense, and speed. The app features dynamic stat bars, passive abilities, and automated actions during the attack phase for a seamless battle experience.

Education

Universitas Terbuka   2022 - Present

Pursuing a Bachelor`s degree in Information Systems.
